Global Declaration of Mayors for Democracy

January – September 2023

The **Global Declaration of Mayors for Democracy**, an initiative of the GPM in cooperation with the German Marshall Fund and the Pact of Free Cities, has seen extensive success in the months following the last summary of activities. The declaration emanates from the commitments mayors made at the Summit for Democracy in 2021 facilitated by the White House. The Declaration was informed by a democracy-focused dialogue hosted by the Chicago Council on Global Affairs and GMF Cities, and propelled by the administration Year of Action ahead of the second US Summit for Democracy in March 2023.

During the GPM Annual Summit 2022 in Katowice, Poland, mayors signed the Declaration, committing to rebuild and reinforce democracy, stand up for free and fair elections and democratic movements worldwide, combat human rights abuses, address urban challenges through the lens of democracy and democratic values, share best practices in inclusive governance, engage in dialogue and action, and keep working on fortifying democracy.

The 100th signature was confirmed just as U.S. Secretary of State Antony Blinken called on mayors to sign the declaration at the US Conference of Mayors Winter Meeting. This marked the first time that a United States Secretary of State addressed American mayors in this forum, demonstrating the growing recognition of the power of urban diplomacy in Washington.

In March 2023, the Declaration was presented at the side-event of the second Summit for Democracy titled **"Building Democracy from the Ground Up: The Global Declaration of Mayors for Democracy"** hosted by the Biden administration. A panel of mayors showcased the role of cities and subnational governments in the affirmation of democratic values and renewal of democracy worldwide.

The panel discussion was moderated by **Ambassador Nina Hachigian**, Special Representative for City and State Diplomacy, U.S. Department of State, and included contributions from GPM Vice Chair **Mayor Rohey Malick Lowe** of Banjul, The Gambia, GPM **Mayor Femke Halsema** of Amsterdam, The Netherlands, **Mayor Tishaura Jones** of St. Louis, USA, **Mayor José Rojas Méndez** of Buenos Aires Cantón, Costa Rica, and **Mayor Oh Se-hoon** of Seoul, The Republic of South Korea.

As of August, the Global Declaration of Mayors for Democracy has been endorsed by 251 mayors from five continents, showing the far-reaching ambition of cities on the international stage, as well as their extensive and effective network.

Urban7: Making Voices of Cities Heard in the G7 Process

January – July 2023

In 2023, the Global Parliament of Mayors continued its leadership in the Urban7, working to make the voices of cities heard in the G7 process. Since January 2023, the GPM and ICLEI formally serve as the U7 Secretariat. In March, city leaders, including GPM Chair **Mayor Peter Kurz**, gathered in Tokyo for the third annual U7 Mayors Summit. The mayors discussed their vision for the role of cities in the G7 process as Japan took on the G7 presidency. The city leaders presented their 2023 U7 Mayors Declaration, which was drafted collaboratively by the national city networks of the G7 members and the U7 Secretariat.

After the Summit, the mayors handed over their declaration to high-level representatives of Japan's G7 Presidency, who welcomed the mayors' input. In April, G7 ministers for Climate, Energy and Environment announced the first-ever G7 Roundtable on Subnational Climate Actions in collaboration with Urban7. The following month, G7 Heads of State emphasized "the transformative power of cities worldwide as drivers for every aspect of sustainable development," in their final communiqué.

The GPM also played a key role in planning and participating in the G7 Sustainable Urban Development Ministers Meeting and drafting the ministers' final communiqué. Representing the Urban7, **Mayor Kizō Hisamoto** (Kobe, Japan) joined the G7 ministers for Urban Development in Takamatsu, Kagawa to address pressing issues facing cities. In 2024, the GPM will continue to play a leading role in this process.
